## 1. INTRODUCTION

This dataset displays data from the National Register of Historic Places (points: historic sites/properties) for Maine, Massachusetts and Rhode Island within 10km of the coastal shoreline. The National Register of Historic Places (NRHP) was established by the National Historic Preservation Act of 1966. The NRHP database is a listing of sites (buildings, objects, etc.) and areas (large properties, districts, etc.) which have some sort of cultural or historical significance in American history and are noteworthy for preservation (<http://www.nps.gov/nr/about.htm>). This dataset is a compilation of NRHP from state databases. Please be advised that some NRHP in this dataset may be missing as the states are currently working on updating their databases and datasets. New Hampshire and Connecticut NRHP are not included in this product since spatial datasets are currently being developed. This regional dataset will be updated as states provide updates to datasets. Users must consult with appropriate State and/or Tribal Preservation Offices in the identification and evaluation of historic properties as stated under the National Preservation Act. This regional dataset compiled by Northeast Ocean Data serves as a baseline for identifying NRHP; users must confirm with appropriate State and/or Tribal Preservation Offices for official listings under the National Register of Historic Places. For more information and current listings of NRHP, please be directed to the National Park Service's National Register of Historic Places site at <http://www.nps.gov/nr/about.htm>.

## 2. PURPOSE

The NRHP provides a listing of important places for the preservation of American history. This dataset is used to support coastal and ocean planning by displaying sites/areas within 10km of the coastal shoreline.

## 3. SOURCES AND AUTHORITIES

- Maine Historic Preservation Commission
- Massachusetts Historical Commission Preservation Planning Division
- MassGIS
- Rhode Island Historic Preservation Commission
- RIGIS

## 4. DATABASE DESIGN AND CONTENT

Native storage format: ArcGIS File Geodatabase – point feature class

Data Dictionary:

Line	Name	Definition	Type	Size
1	OBJECTID*	Internal feature number	Object ID	*
2	Shape*	Geometric representation of the feature	Geometry	*
3	historicName	Name of historic site or area	String	250
4	commonName	Alternate name of historic site or area	String	250
5	address	Address of site or area	String	250
6	town	Town of historic site or area	String	250
7	state	State of historic site or area	String	2
8	resourceType	Type of historic site	String	250
9	architecturalStyle	Architectural style category	String	250
10	maker	Architect, designer, engineer, artist, contractor or other entity identified as responsible for the design or construction of the resource	String	250
11	useType	MA: How the resource was used during the time it was recorded in inventory. ME: historic function of the property	String	250
12	significance	The category in which the building is significant based on National Register standards.	String	250
13	historicDesignation	Resources listed in National Register database	String	250
14	designationDates	Date of the corresponding designation	String	250
15	constructionYear	Year resource was built as recorded on inventory form or other record	String	4
16	demolished	Denotes if the resource has been	String	1

		demolished		
17	stateID	ID assigned by state	String	50
18	source	Where the dataset was supplied from	String	250

Feature Class Name: NationalRegisterHistoricPlacesPoints

Total Number of Unique Features: 25,306

Dataset Status: Updated as needed

## 5. SPATIAL REPRESENTATION

Geometry Type: points

Reference System: GCS North American 1983

Horizontal Datum: North American Datum 1983

Ellipsoid: Geodetic Reference System 1980

XY Resolution: XY Scale is 999999999.99999988

XY Tolerance: 8.9831528411952133e-009

Geographic extent: -71.858200 to -66.950412, 41.178586 to 45.940524

ISO 19115 Topic Category: boundaries, planningCadastre, society, structure

Place Names:

Belfast, Maine; Boston, Massachusetts; Brunswick, Maine; Cape Cod, Massachusetts;  
Falmouth, Massachusetts; Newport, Rhode Island; Portland, Maine; Providence, Rhode  
Island

Recommended Cartographic Properties:

(Using ArcGIS ArcMap nomenclature)

Simple Fill Symbol: color: 128-102-64, no outline, size=4.0, color model: RGB

Scale range for optimal visualization: 1:6,000 to 1:500,000

## 6. DATA PROCESSING

A description of each state's datasets and the subsequent processing are described below.

**Maine** - Maine's National Register of historic place point dataset contained 1,283 points depicting the geographic locations of properties/sites for the state of Maine. The dataset was provided by Maine Historic Preservation Commission. To create the regional dataset we selected features within 10km of the coastal shoreline in order to show coastal locations. This subset includes 652 features. The following fields were preserved from the original shapefile: HISTNAME, SIGNIF\_1, SIGNIF\_2, TYPE, STREEDADD, TOWN, and FMSRCORG. County was not included in the regional layer.

- HISTNAME is found in the historicName field of the regional layer
- SIGNIF\_1 is found in the significance field of the regional layer
- SIGNIF\_2 is found in the significance field of the regional layer
- TYPE is found in the useType field of the regional layer
- STREEDADD is found in the address field of the regional layer
- TOWN is found in the town field of the regional layer
- FMSRCORG is found in the source field of the regional layer

This dataset was last updated in October 2014. Please note that Maine is constantly updating their dataset as new sites/information are added or edited.

Architectural Historian  
Maine Historic Preservation Commission  
Christi.Mitchell@maine.gov

**Massachusetts** – Massachusetts's National Register of historic place point dataset contained 151,710 points depicting the geographic locations of sites/properties for the state of Massachusetts. The dataset was downloaded from MassGIS: <http://www.mass.gov/anf/research-and-tech/it-serv-and-support/application-serv/office-of-geographic-information-massgis/datalayers/srhp.html> was created by Massachusetts Historical Commission Preservation Planning Division (<http://maps.mhc-macris.net/>). To create the regional dataset we selected features within 10km of the coastal shoreline in order to show coastal locations. This subset includes 24,333 features. The following fields were preserved from the original shapefile: MHCN, DEMOLISHED, TYPE, DESIGNATIO, DESIGNAT1, HISTORIC\_N, COMMON\_NAM, ADDRESS, TOWN\_NAME, CONSTRUCTI, ARCHITECTU, MAKER, USE\_TYPE, and SIGNIFICAN.

- MHCN is found in the StateID field of the regional layer
- DEMOLISHED is found in the demolished field of the regional layer
- TYPE is found in the resourceType field of the regional layer
- DESIGNATIO is found in the historicDesignation field of the regional layer
- DESIGNAT1 is found in the designationDates field of the regional layer

- HISTORIC\_N is found in the historicName field of the regional layer
- COMMON\_NAME is found in the commonName field of the regional layer
- ADDRESS is found in the address field of the regional layer
- TOWN\_NAME is found in the town field of the regional layer
- CONSTRUCTI is found in the constructionYear field of the regional layer
- ARCHITECTU is found in the architecturalStyle field of the regional layer
- MAKER is found in the maker field of the regional layer
- USE\_TYPE is found in the useType field of the regional layer
- SIGNIFICAN is found in the significance field of the regional layer

This dataset was last updated in September 2014. Please note that Massachusetts is constantly updating their dataset as new sites/information are added or edited.

Miles Shugar  
 GIS Data Entry Supervisor  
 Massachusetts Historical Commission  
 Preservation Planning Division  
 gismgr@sec.state.ma.us

**Rhode Island** - Rhode Island's National Register of historic place point dataset contained 381 points depicting the geographic locations of sites/properties for the state of Rhode Island. The National Register Historic Sites dataset was downloaded from RIGIS (<http://www.edc.uri.edu/rigis/spfdata/society/histpnts.zip>) and was created by the Rhode Island Historic Preservation Commission. To create the regional dataset we selected features within 10km of the coastal shoreline in order to show coastal locations. This subset includes 321 features. The following fields were preserved from the original shapefile: NAME, CODE and TOWN. AREA, PERIMETER, HISTTEMP\_, HISTEMP\_I, HPNT\_, and HPNT\_ID were not included in the regional layer.

- NAME is found in the historicName field of the regional layer
- CODE is found in the stateID field of the regional layer
- TOWN is found in the town field of the regional layer

This dataset was last updated in 1995. Please note that Rhode Island is constantly updating their historic site database as new sites/information are added or edited, it is unknown when an updated spatial dataset will be created.

Joanna Doherty  
 Senior Architectural Historian  
 Rhode Island Historical Preservation and Heritage Commission

joanna.doherty@preservation.ri.gov

Processing environment: Microsoft Windows 7 Version 6.1 (Build 7601) Service Pack 1; Esri ArcGIS 10.2.2.3552

	Process Steps Description
1	Shapefiles were MERGED
2	Attributes were edited in the editing environment to reflect information that was consistent among the datasets and to generalize existing information
3	State and source fields were added to attribute table
4	Merged product was CLIPPED using 10km buffered NOAA medium resolution shoreline to create final product

## 7. QUALITY PROCESS

Attribute Accuracy: Accuracy is based on original state datasets.

Logical Consistency: None

Completeness: Please be advised that some NRHP in this dataset may be missing as the states are currently working on updating their databases and datasets. New Hampshire and Connecticut NRHP are not included in this product since spatial datasets are currently being developed.

Positional Accuracy: May vary by state.

Timeliness: Based on the best available information as of October 2014.

- Maine: October 2014
- Massachusetts: September 2014
- Rhode Island: 1995

Use restrictions: Please consult individual source metadata for additional use restrictions. Users must consult with appropriate State and/or Tribal Preservation Offices in the identification and evaluation of historic properties as stated under the National Preservation Act. This regional dataset compiled by Northeast Ocean Data serves as a baseline for identifying NRHP; users must confirm with appropriate State and/or Tribal Preservation Offices for official listings under the National Register of Historic Places. For more information and current listings of NRHP, please be directed to the National Park Service's National Register of Historic Places site at <http://www.nps.gov/nr/about.htm>.

The Nature Conservancy (TNC) compiled this data set from publicly available data sources and this data is freely distributable without permission from this TNC resource office. This

data set must be cited on all electronic and hard copy products using the language of the Data Set Credit. Use and analysis of the geographic data are limited by the scale at which the data was collected and mapped, and that, as a regional analysis, it is not intended for site level decisions. The Nature Conservancy or Northeast Regional Ocean Council shall not be held liable for improper or incorrect use of the data described and/or contained herein. Any sale, distribution, loan, or offering for use of these digital data, in whole or in part, is prohibited without the approval of the Nature Conservancy. The use of these data to produce other GIS products and services with the intent to sell for a profit is prohibited without the written consent of the Nature Conservancy. All parties receiving these data must be informed of these restrictions. The Nature Conservancy and each state/source listed in this document shall be acknowledged as data contributors to any reports or other products derived from these data.

**Access Constraints:** Please consult individual source metadata for additional access constraints. The Nature Conservancy (and the individual sources) reserves all rights in data provided. All data are provided as is. This is not a survey quality dataset. The Nature Conservancy makes no warranty as to the currency, completeness, accuracy or utility of any specific data. This disclaimer applies both to individual use of the data and aggregate use with other data. It is strongly recommended that careful attention be paid to the contents of the metadata file associated with these data.

**Distribution Liability:** Neither The Nature Conservancy nor any of the ecoregional planning team participants or Northeast Regional Ocean Council makes any warranty, expressed or implied as to the use or appropriateness of use of the enclosed data, nor are there warranties of merchantability or fitness for a particular purpose or use. No representation is made as to the currency, accuracy or completeness of the information in this dataset or of the data sources on which it is based. Neither The Nature Conservancy nor any of the ecoregional planning team participants or Northeast Regional Ocean Council shall be liable for any lost profits or consequential damages, or claims against the user by third parties.
